DHIS2 FlexiPortal Overview

The Challenge

DHIS2 holds powerful data - but getting that data to the public? That's the real challenge.

Our Solution

DHIS2 FlexiPortal is a ready-to-deploy, customizable portal that makes sharing DHIS2 data with the public quick and easy - no coding required.

Key Features

- Easy configuration via a DHIS2 manager app

- Supports all DHIS2 visualizations (charts, maps, dashboards)

- Share documents and display static content like announcements or info pages

- Mobile-friendly and SEO optimized

- Secure, with role-based access for sensitive data

Real Impact

With FlexiPortal, we rebuilt the Tanzania Health Portal in just one day - a task that used to take months. It's fast, flexible, and built for real-world needs.

Why It Matters

FlexiPortal turns DHIS2 data into public insights - helping governments, NGOs, and projects share data that informs, empowers, and drives impact.

Because when data is open, everyone wins.
